Equal Parts and Unit Fractions Mission

Warm-up and worked example

Name: ______________________ **Date:** _______________

PAGE 1 | WEEK 6, DAY 1

YOUR MISSION **Understand a unit fraction as one equal part of a whole.**	**SMART MOVE** **Keep the whole the same and ask how large one part is.**

Math Talk

Which is larger, one half or one fourth? Why?

My idea:

New Words

fraction	numerator	denominator
My meaning or picture:	My meaning or picture:	My meaning or picture:

Worked Example

Do this example with your teacher. Say what changes and what stays the same.

1. Fold equal-sized strips into halves, thirds, fourths, sixths, and eighths.
2. Name one part as 1/b.

What the example shows: _____________________________________

Equal Parts and Unit Fractions Mission

Learn it and show your thinking

Name: ______________________ **Date:** _______________

YOUR MISSION **Follow the learning path, then explain the big idea.**	SMART MOVE **Draw before asking for a rule.**

[ ] **Step 1:** Fold equal-sized strips into halves, thirds, fourths, sixths, and eighths.

[ ] **Step 2:** Name one part as 1/b.

[ ] **Step 3:** Explain that the denominator tells how many equal parts make the whole.

[ ] **Step 4:** Contrast equal and unequal partitions.

[ ] **Step 5:** Keep the whole fixed when comparing.

My model, drawing, or organized work:

The big idea in my own words:

Equal Parts and Unit Fractions Mission

Practice lab

PAGE 3 | WEEK 6, DAY 1

YOUR MISSION **Use a model, equation, or explanation for every task.**	**SMART MOVE** **Check whether your answer is reasonable.**

1. Partition shapes into equal parts.

2. Label unit fractions.

3. Identify non-examples.

4. Order several unit fractions using strips.

Choose one answer and prove it another way:

Equal Parts and Unit Fractions Mission

Challenge and final check

Name: ______________________ **Date:** _______________

PAGE 4 | WEEK 6, DAY 1

YOUR MISSION **Try an unfamiliar problem and defend your reasoning.**	**SMART MOVE** **A wrong first idea can still lead to a strong solution.**

Challenge Mission

Can a shape be divided into four equal areas that do not have the same shape? Create an example.

My plan:

My solution and proof:

Final Check

Explain why 1/8 < 1/4 for the same whole.

[ ] I can teach it	[ ] I need practice	[ ] I need help

Equal Parts and Unit Fractions Mission

Reusable math tool
