Skip-Counting and Table Patterns Mission

Warm-up and worked example

Name: ______________________ **Date:** _______________

PAGE 1 | WEEK 3, DAY 3

YOUR MISSION **Connect skip-counting to multiplication and identify patterns in a multiplication table.**	**SMART MOVE** **Draw groups or an array before relying on memory.**

Math Talk

What patterns do you notice in multiples of 2, 5, and 10?

My idea:

New Words

equal groups	factor	product
My meaning or picture:	My meaning or picture:	My meaning or picture:

Worked Example

Do this example with your teacher. Say what changes and what stays the same.

1. Mark multiples of 2, 5, and 10 on a hundreds chart.
2. Connect the nth multiple to n x factor.

What the example shows: _____________________________________

Skip-Counting and Table Patterns Mission

Learn it and show your thinking

Name: ______________________ **Date:** _______________

YOUR MISSION **Follow the learning path, then explain the big idea.**	SMART MOVE **Draw before asking for a rule.**

[ ] **Step 1:** Mark multiples of 2, 5, and 10 on a hundreds chart.

[ ] **Step 2:** Connect the nth multiple to n x factor.

[ ] **Step 3:** Explore even/odd results.

[ ] **Step 4:** Color the diagonal square facts.

[ ] **Step 5:** Find symmetry across the diagonal.

My model, drawing, or organized work:

The big idea in my own words:

Skip-Counting and Table Patterns Mission

Practice lab

Name: ______________________ **Date:** _______________

PAGE 3 | WEEK 3, DAY 3

YOUR MISSION **Use a model, equation, or explanation for every task.**	**SMART MOVE** **Check whether your answer is reasonable.**

1. Complete selected rows and columns of a multiplication table.

2. Fill missing values in skip-counting sequences.

3. Explain why every multiple of 10 is also a multiple of 5.

4. Decide whether claims about patterns are always, sometimes, or never true.

Choose one answer and prove it another way:

Skip-Counting and Table Patterns Mission

Challenge and final check

Name: ______________________ **Date:** _______________

PAGE 4 | WEEK 3, DAY 3

YOUR MISSION **Try an unfamiliar problem and defend your reasoning.**	**SMART MOVE** **A wrong first idea can still lead to a strong solution.**

Challenge Mission

Find two different multiplication patterns that pass through 24 on the table.

My plan:

____

____

____

My solution and proof:

____

____

____

____

Final Check

How does knowing 5 x 6 help find 6 x 5?

____

[ ] I can teach it	[ ] I need practice	[ ] I need help

Skip-Counting and Table Patterns Mission

Reusable math tool
