

Estimation and Place-Value Problems

Mission

Warm-up and worked example

Name: _____

Date: _____

PAGE 1 | WEEK 1, DAY 5

YOUR MISSION Use place value and rounding to solve problems and judge reasonableness.

SMART MOVE Start with the greatest place and explain what stays the same.

Math Talk

Is $2,984 + 3,121$ closer to 5,000, 6,000, or 7,000? Explain.

My idea:

New Words

place value	standard form	expanded form

Worked Example

Do this example with your teacher. Say what changes and what stays the same.

1. A library has 2,487 fiction books and 1,536 nonfiction books. About how many books are there? Then find the exact total.

What the example shows: _____

Estimation and Place-Value Problems

Mission

Learn it and show your thinking

Name: _____

Date: _____

PAGE 2 | WEEK 1, DAY 5

YOUR MISSION Follow the learning path, then explain the big idea.

SMART MOVE Draw before asking for a rule.

[] **Step 1:** A library has 2,487 fiction books and 1,536 nonfiction books. About how many books are there? Then find the exact total.

My model, drawing, or organized work:

The big idea in my own words:

Estimation and Place-Value Problems

Mission

Practice lab

Name: _____

Date: _____

PAGE 3 | WEEK 1, DAY 5

YOUR MISSION Use a model, equation, or explanation for every task.

SMART MOVE Check whether your answer is reasonable.

1. Write 7,042 in expanded form and in words.

2. Use $<$, $>$, or $=$: 6,398 ____ 6,389. Explain using place value.

3. Round 4,672 to the nearest 10 and nearest 100.

4. Estimate $2,487 + 1,536$ to the nearest hundred, then find the exact sum.

5. Find $7,000 - 2,856$ and check with addition.

6. Create a four-digit number with 5 hundreds and a 0 in the tens place. Show two forms.

Choose one answer and prove it another way:

Estimation and Place-Value Problems

Mission

Challenge and final check

Name: _____

Date: _____

PAGE 4 | WEEK 1, DAY 5

YOUR MISSION Try an unfamiliar problem and defend your reasoning.

SMART MOVE A wrong first idea can still lead to a strong solution.

Challenge Mission

I am a four-digit number. My hundreds digit is twice my thousands digit. My ones digit is 3 less than my tens digit. Find all possible answers.

My plan:

My solution and proof:

Final Check

Write one thing that is secure and one skill to revisit next week.

☐ I can teach it

☐ I need practice

☐ I need help

Estimation and Place-Value Problems

Mission

Reusable math tool
