

Comparing Fractions Mission

Warm-up and worked example

Name: _____

Date: _____

PAGE 1 | WEEK 6, DAY 4

YOUR MISSION Compare fractions with common numerators or denominators and justify comparisons.

SMART MOVE Keep the whole the same and ask how large one part is.

Math Talk

Which is larger: $\frac{3}{8}$ or $\frac{5}{8}$? What stays the same?

My idea:

New Words

fraction	numerator	denominator
My meaning or picture:	My meaning or picture:	My meaning or picture:

Worked Example

Do this example with your teacher. Say what changes and what stays the same.

1. Compare equal denominators by counting equal-size parts.
2. Compare equal numerators by reasoning about part size.

What the example shows: _____

Comparing Fractions Mission

Learn it and show your thinking

Name: _____

Date: _____

PAGE 2 | WEEK 6, DAY 4

YOUR MISSION Follow the learning path, then explain the big idea.

SMART MOVE Draw before asking for a rule.

[] **Step 1:** Compare equal denominators by counting equal-size parts.

[] **Step 2:** Compare equal numerators by reasoning about part size.

[] **Step 3:** Use benchmarks 0, $\frac{1}{2}$, and 1.

[] **Step 4:** Require the same whole.

[] **Step 5:** Write comparisons using $<$, $>$, and $=$.

My model, drawing, or organized work:

The big idea in my own words:

Comparing Fractions Mission

Practice lab

Name: _____

Date: _____

PAGE 3 | WEEK 6, DAY 4

YOUR MISSION Use a model, equation, or explanation for every task.

SMART MOVE Check whether your answer is reasonable.

1. Compare $\frac{3}{7}$ and $\frac{5}{7}$.

2. Compare $\frac{2}{3}$ and $\frac{2}{5}$.

3. Compare $\frac{4}{8}$ and $\frac{1}{2}$.

4. Explain one comparison with a number line.

Choose one answer and prove it another way:

Comparing Fractions Mission

Challenge and final check

Name: _____

Date: _____

PAGE 4 | WEEK 6, DAY 4

YOUR MISSION Try an unfamiliar problem and defend your reasoning.

SMART MOVE A wrong first idea can still lead to a strong solution.

Challenge Mission

Which is larger: $\frac{3}{4}$ of a small pizza or $\frac{1}{2}$ of a large pizza? Explain what information is missing.

My plan:

My solution and proof:

Final Check

Explain why a larger denominator can mean smaller pieces.

☐ I can teach it

☐ I need practice

☐ I need help

Comparing Fractions Mission

Reusable math tool

Name: _____

Date: _____

PAGE 5 | WEEK 6, DAY 4

YOUR MISSION Use this page to draw, model, organize, and check.

SMART MOVE Keep the whole the same and ask how large one part is.

Fraction Strips and Number Lines

Divide this strip into 2 equal parts:

--	--

Divide this strip into 3 equal parts:
