

Graphs and Data Displays Mission

Warm-up and worked example

Name: _____

Date: _____

PAGE 1 | WEEK 7, DAY 5

YOUR MISSION Collect, display, and interpret data using scaled graphs, line plots, and simple circle graphs.

SMART MOVE Name the unit and estimate before calculating.

Math Talk

If each picture stands for 4 votes, how many votes do 6 pictures show?

My idea:

New Words

unit	estimate	elapsed time

Worked Example

Do this example with your teacher. Say what changes and what stays the same.

- 1. Collect a small data set.
- 2. Make a scaled pictograph.

What the example shows: _____

Graphs and Data Displays Mission

Learn it and show your thinking

Name: _____

Date: _____

PAGE 2 | WEEK 7, DAY 5

YOUR MISSION Follow the learning path, then explain the big idea.

SMART MOVE Draw before asking for a rule.

[] **Step 1:** Collect a small data set.

[] **Step 2:** Make a scaled pictograph.

[] **Step 3:** Make a scaled bar graph.

[] **Step 4:** Make or read a simple circle graph showing category totals.

[] **Step 5:** Compare data across categories.

My model, drawing, or organized work:

The big idea in my own words:

Graphs and Data Displays Mission

Practice lab

Name: _____

Date: _____

PAGE 3 | WEEK 7, DAY 5

YOUR MISSION Use a model, equation, or explanation for every task.

SMART MOVE Check whether your answer is reasonable.

1. A lesson starts at 9:35 and ends at 10:20. How long is it?

2. Which is a reasonable mass for a watermelon: 4 grams, 4 kilograms, or 40 kilograms?

3. A jug holds 2 liters. How many 250-milliliter cups fill it?

4. Measurements are $3\frac{1}{4}$, $3\frac{1}{2}$, $3\frac{1}{4}$, and $3\frac{3}{4}$ inches. Which occurs most often?

5. A graph scale counts by 5. A bar reaches the fourth tick above zero. What value is shown?

6. Explain why units and graph scales must be written with an answer.

Choose one answer and prove it another way:

Graphs and Data Displays Mission

Challenge and final check

Name: _____

Date: _____

PAGE 4 | WEEK 7, DAY 5

YOUR MISSION Try an unfamiliar problem and defend your reasoning.

SMART MOVE A wrong first idea can still lead to a strong solution.

Challenge Mission

Create a graph where the scale is 3. Write a question that requires multiplication and subtraction.

My plan:

My solution and proof:

Final Check

Why must you read the key before answering questions about a scaled graph?

☐ I can teach it

☐ I need practice

☐ I need help
